

# Marina\_Pinto

## FRONTEND DEVELOPER

## CURRICULUM VITAE

mtspinto@gmail.com • +27817627536

# // ABOUT ME

As a lifelong learner, I am constantly seeking new opportunities to improve and expand my knowledge and skills. Each project I undertake presents its own set of unique challenges, which I approach by conducting thorough research and implementing effective solutions.

For instance, I have found that while prototyping with Adobe XD is enjoyable, it is not always the most efficient method. Instead, I utilise flutter for app development, allowing me to easily collaborate with our backend developers who handle server-side API and logic. Similarly, for website development, I create templates using HTML and bootstrap, rather than designing them in Photoshop. I then convert them to PHP for menu includes and form validations.

## // DETAILS

Name: Marina Pinto  
Date of Birth: 03 May 1979  
ID No: Available on request  
Race: Caucasian  
Gender: Female  
Matric: Yes on request  
Drivers License: Yes  
Own Transport: Yes  
Location: South Africa  
Email: mtspinto@gmail.com  
Cell: +2781 762 7536

## // EDUCATION

1998 – current

Online research on all types of UI development and design.

1997 - 1998

Diploma in Computer Graphics  
College Campus (JHB)  
Five distinctions.

1992 – 1996 Matriculated

Dinwiddie High School  
Average percentage 60%.  
Distinction in Accounting.

## // SOFTWARE

App UI dev & design

- Android Studio
- Visual Studio Code
- Adobe XD

Multimedia Design

- Adobe Photoshop
- Adobe Illustrator
- Adobe After Effects
- Adobe Media Encoder
- Microsoft Software

Website design & dev

- Adobe Dreamweaver
- Spring Tools Suite
- Notepad++

Project management

- Atlassian > Jira tasks
- Bitbucket > GIT commits

/\* ----- \*/

- Flutter Dart UI/UX
- HTML & Bootstrap CSS coding of UI for ASP, JSP & PHP
- Usage of jQuery

## // CURRENT EMPLOYMENT

Umsiko Design - Freelancer

- Mobile App UI frontend developer
- Website design and development
- Graphic design for print and web platforms
- Videos for the various projects

I am remotely providing support to 3 developers with their UI/UX needs across different platforms, such as

- flutter dart for app development
- html, css, php and javascript for web development
- sprites for unity C# game developer

Additionally, I work closely with many clients who come up with innovative ideas for the projects and assigns me design tasks for websites, apps and print work.

## // PAST EMPLOYMENT

2005

Umsiko (June 2005 - Current) - Freelancer

- Frontend developer & graphic designer.
- Static & Joomla sites (PHP + Bootstrap)
- UI Flutter coding for mobile apps

2017

Smartcall (July 2017 - July 2024) Retrenched

- Frontend developer & graphic designer.
- UI for PHP, JSP & HTML using Bootstrap
- UI Flutter coding for mobile apps

2000

Xnet Internet (June 2000 - June 2005)

- Senior website and graphic designer
- Static websites, logos and branding for startups and designs for print.
- Chose to freelance at 26

1998

Netactive (March 1998 - June 2000)

- Junior website and graphic designer
- Static websites, logos and branding for startups and designs for print.
- Company bought out by Tiscali

## USER PROCESS FOR BUYERS AND VENDORS

### ORGANIGRAM

The organigram will give you a better understanding of the flow and user process. Areas with **→** will take you to those screens.

```

    graph TD
      Loading[LOADING SCREEN] --> Registration[REGISTRATION]
      Loading --> Login[LOGIN]
      Registration --> User[USER SCREEN]
      Login --> User
      User --> Buyers[BUYERS]
      User --> Vendors[VENDORS]
      User --> AllUsers[ALL USERS]
      Buyers --> BuyerList[BUYER ID, NAME, PHONE, EMAIL, ADDRESS, STATUS, ROLE, REGISTERED, REGISTERED DATE, REGISTERED BY, REGISTERED ON]
      Vendors --> VendorList[VENDOR ID, NAME, PHONE, EMAIL, ADDRESS, STATUS, ROLE, REGISTERED, REGISTERED DATE, REGISTERED BY, REGISTERED ON]
      AllUsers --> AllUsersList[USER ID, NAME, PHONE, EMAIL, ADDRESS, STATUS, ROLE, REGISTERED, REGISTERED DATE, REGISTERED BY, REGISTERED ON]
  
```

All users are accessible by all users. However, the Buyers will only see a "Become a Vendor" button on their screens, means for Vendors (seller).

### SELL

Users will be able to do the following

1. See their static QR code  
A static QR code means that the vendor needs only to display their QR code and tell the buyer how much the item is.
2. Create a dynamic QR code  
Generated by the vendor with a specific amount and description. So buyers cannot edit the price.
3. View Sales  
Successful sales to buyers will be located in the "Transaction History" section under the Sales tab.

### SALES - VENDORS

1. Vendors will be able to see their full list of sales in date descending format and can search. They can tap on each transaction and view more details.
  - a. Dynamic invoice with description, fee by vendor, and a tip added by the buyer.
  - b. Static invoice with standard descriptions, and just a tip added by the buyer.
  - c. Dynamic invoice with no fee / tip added from either buyer or vendor.

All will have Date, Buyers User ID / Vendor Name, QR code & Invoice numbers and card used for the transactions.

### BUY

Users will be able to do the following

1. Scan a static QR code  
A static QR code means the user will input the amount themselves when making the purchase.
2. Scan a dynamic QR code  
The dynamic QR code generated by the vendor means that the amount and description are locked.

There is a "tip" option so the buyer can add a tip if they want to.

Depending on the user security setting, both options will either:

- a. Request a PIN (specified by user) / do a biometric authentication.
- b. Pay the amount immediately.

### BUY STATIC ITEM

1. Tapping BUY opens the QR Scanner and user scans vendors Static QR code.
2. User inputs an amount for the vendors product. See bottom button for total.
3. Select if they want to leave a tip. (Note: bottom button changes with total).
4. They choose the card they want to use for the purchase, or leave as is.
5. If a PIN was created during the security settings, setup they will put it in here.
6. Payment Successful. View transaction history or back to home buttons available.

# UMSIKO

mtspinto@gmail.com • +27817627536  
[www.fb.com/Umsiko/photos\\_albums](http://www.fb.com/Umsiko/photos_albums)

In 2005, I founded my company, Umsiko, and formed a strategic partnership with Enyuka, an IT company. As their exclusive contractor, I took charge of all aspects of their corporate branding, website development, and print marketing. Additionally, they entrusted me to work with their clients, extending my services beyond their organisation.

Following the economic downturn, I made the decision to conclude my partnership with Enyuka in 2015, continued freelancing and transitioned to an amazing new opportunity at Smartcall in 2017.

Within the following pages, you will discover my portfolio from 2005 to present. Feel free to explore the diverse range of work I have accomplished for clients over the years in South Africa, America, Australia and New Zealand.

**enyuka.com**  
LEADING TECHNOLOGY SPECIALISTS • VOICE • DATA • VIDEO • ENGAGE

As a brand, enyuka.com encompasses the synergies of several specialised information and communication technology companies with the common vision of developing and implementing innovative and effective business solutions.

We provide our clients with the tools to become recognised entities within their respective industries by maximising the potential of their businesses through best in class technology.

An ICASA-licensed Internet service provider, Enyuka is registered with the Film and Publication Board, and is an active member of Internet Service Providers Association (ISPA) which means the company is bound by an ethical code of conduct which protects you as the client. In addition to this, we are a proudly South African company with a level 4 BEE status.

**CONNECTING YOUR BUSINESS**

MTN Business is a multinational, Tier-1 Internet service provider and ISPA member. Leveraging off the MTN cellular network, it provides clients with innovative, high quality carrier grade services and leading fixed and mobile convergence solutions.

Partners: Kaseya, HP Business Partner, Microsoft Partner, ICASA, ISPA

enyuka.com  
MTN Business

**Tired of Internet and Telephone Connectivity issues?**

enyuka.com now provides high quality, reliable Internet access and carrier grade voice services in Van Eck Park, a service which is proudly brought to you in partnership with MTN Business.

Through the latest Microwave Technology and use of MTN's licenced spectrum, connectivity is established at Carnival Industrial Park, and is then distributed from this point using either fibre or wireless technology, depending on your location. This new technology allows for carrier grade speeds in excess of 30Mbps.

**Internet Services:**  
Business today relies on a fast and stable Internet connection. Added to this, a high quality, graded service is becoming increasingly critical as services migrate to the cloud. As part of our new offering the connectivity to your area is run through the carrier grade MTN service which possesses uncontented local bandwidth and a low international contention ratio (i.e. 1:4 on international bandwidth). This ensures that you achieve the speeds for which you are paying from a dependable platform with a 99.99% uptime.

**Voice Services:**  
While your Telkom telephone number remains unchanged, calls are routed in and out through our systems over Microwave link resulting in substantially reduced call rates. What's more, the service can interface with both Analog and VoIP switchboards. Alternatively, Enyuka can provide you with the latest Hosted PBX technology to avoid the capital outlay of a new system.

**Value Added Services:**  
enyuka provides a full spectrum of managed services including ICT support, infrastructure, installation (cabling), VoIP switchboards, cloud services (Microsoft Office 365, hosted exchange, etc.), hardware supply and commissioning. SMS services, website and graphic design services, software development and internet services as well as tailored ICT solutions and consulting.

**ATTENTION: EMPLOYEE BENEFIT MANAGERS**

The reality  
Less than 6% of South Africans can afford to retire.  
Current retirees have an income replacement ratio of less than 30%.

The challenge  
Over 40% of working South Africans expect their children to support them when they retire.  
Are your employees part of these statistics?  
Why should your employees save for retirement if they do not know the final outcome?

The solution  
AOS is an actuarial consulting firm, serving over 500 000 employees with over R100 billion in assets. We build customized, long-term retirement solutions, which help employees to Retire With Certainty!

How can AOS help you?  
Our approach helps each employee to set and track their progress to their target retirement income, enabling them to Retire With Certainty!
